

Nappy Changing Policy

Parents/carers are required to provide the nursery with their child's nappies, wet wipes and cream, either daily or in bulk. When supplies are running low, staff will notify the parents/carers of this. As a nursery we are happy to support parents using reusable nappies.

Generally, the children have their nappies changed during the morning session approximately 11am, during the afternoon session approximately 2pm and during the evening session approximately 4pm. In between these times any child that has soiled or appears wet will be changed accordingly.

Staff will notify parents/carers of any noticeable changes which cause them concern such as nappy rashes, diarrhea, constipation or dry nappies.

All nappy changes/checks will be recorded on the Family App.

If a parent has specific requests regarding nappy changes such as the use of cotton wool and water as opposed to wet wipes or for more frequent nappy changes, staff will be happy to meet these requests.

During nappy changing times, babies and children's privacy will be considered where they are taken to a designated changing area. (please see **privacy policy**)
